Warsaw, Poland · Open to remote

I design products where many roles, rules and data meet. 6+ years designing for businesses, their customers and their employees in insurance, heavy industry, energy and internal tools: from discovery workshops and access models to design systems, accessibility and developer-ready handoff. With a degree in computer science, I speak developer. Recent results: a customer portal that won against dozens of vendors and is now live with 3 customers across dozens of mine sites, and WCAG 2.2 AA coverage raised from 65% to 93% across 5 verticals.

EXPERIENCE

Product Designer, Design lead

Andersen · Sep 2021 - Present

2026

Project: TAKRAF Customer Portal

Industrial · B2B · web & mobile

- Took the portal from a pre-sale concept to a live product: two weeks of discovery workshops, a two-axis access model for 7 roles and 160+ screens in English and Spanish.
- My pre-sale concept was part of the proposal that won against dozens of vendors. The portal is live with 3 customers across dozens of mine sites.
- Proposed QR codes on machines: one scan instead of ~6 steps. They now ship on every new TAKRAF machine, and service requests come in fully online.

2022 - 2025

Project: Allianz Partners · allyz

Insurtech · B2C · web & app

- Designed customer account management for the allyz web and app.
- Led accessibility ahead of the European Accessibility Act: one process for 5 verticals and 3 more designers, self-audits in Figma and fixes built into the Allyz Next design system.
- WCAG 2.2 AA coverage grew from 65% to 93%, with fixes in production before the June 2025 deadline.

2025

Project: CleanConnect.ai

Energy · AI SaaS · B2B

- Designed new data-heavy features across 5 sub-products, from emissions monitoring and incidents to energy certificates.
- Concepts for client demos, interactive prototypes and 62+ pages of final UI within the existing design system.

2021 - 2022

Project: Andersen internal CRM

Internal tools · B2E

- Lead designer for the company's CRM: team profitability calculator, roles and permissions, filters with saved templates for large tables.
- Set up research on the project, ran usability tests and managed junior designers.

Ongoing

Mentoring: designers at Andersen

- Assess designers at every stage of the theory programme, help with technical questions on their real projects and support them until they feel confident.

UX/UI Designer

Everlabs · May 2020 - Sep 2021

Projects: client sites, dashboards and internal tools

B2B · B2C · CRM · SaaS

- Business research and design for sites, dashboards and internal tools: UI kits, design styles, wireframes, prototypes and developer-ready designs.

PROJECTS & STUDY

Product Design course

Projector Institute · 2022 · Real briefs, real users, solutions evaluated by the companies

2022

Project: Liki24, pharmacy delivery platform

B2C e-commerce · team of 6 product designers

- Brief from Liki24: users left at checkout. Conversion had fallen below 50%, and to around 30% after wartime curfews limited night delivery.
- Ran 5 of the team's 29 interviews with real users and turned the findings into 6 hypotheses with metrics, prototypes and usability tests.
- Liki24's stakeholder selected the team's solutions for further development.

2022

Project: Vchasno, e-document and e-signature platform

B2B SaaS · team of 5 product designers

- Brief from Vchasno, used by 500K+ companies: departments signed through one shared account, so per-user billing lost revenue.
- Mapped flows with OOUX and BPMN. On my own initiative, designed the more complex direction: group signing from personal accounts. Both directions were tested with users.
- Vchasno picked our solution as one of its top two options.

INDEPENDENT & COMMUNITY

Side project

Founder · My own product

Startup · from idea to pilot

- Took a product of my own from idea to a working app and a pilot, bringing 40 partners and 5 companies on board.

Mentoring

One-on-one mentoring

- Built a learning plan, lectures and a practice product for a designer starting out, reviewed her work and prepared her portfolio and interviews. She landed a design job after two months.

2020 - 2022

Organizer of design events · Game of Fonts

Design community · part-time

- Organised design competitions and events for a local design community, ran its social media and wrote articles.

SKILLS

Methods — Discovery workshops, stakeholder and user interviews, usability testing, JTBD, OOUX, BPMN, customer journey maps, Value Proposition Canvas, information architecture, user flows, accessibility (WCAG 2.2 AA), localisation

Tools — Figma, design systems and variables, prototyping, FigJam, Miro, Jira, Confluence, HTML & CSS

EDUCATION

2020 - 2022 — **Bachelor's degree in Computer Science**, Cherkasy State Technological University

2022 — **Product Design & UX Research**, Projector Institute

2016 - 2020 — **Junior Specialist in Software Development**, Cherkasy Polytechnic College
